Interfaculty Scientific Association of Tourism

invite you to the International Scientific Conference

Contemporary Tourism - Trends & Challenges

on April 26, 2023.

Scope of the Conference

covers the issues of tourism development on various levels, including issues such as: awareness of sustainable tourism development, challenges on the market of tourist services in the face of crisis situations, climate change or demographic changes, the role of new information and communication technologies used in tourist activities, marketing challenges on the market of tourist and tourism-related services, the role of tourism in regional development and other current trends in tourism.

We invite representatives of science, the tourism sector as well as doctoral students and students to participate in the Conference.

Participation

Participation in the conference is free of charge

Conference language: English

Conference will be held in Teams.

Participation options:

1. Participation in an online conference with a presentation
2. Participation in an online conference with a poster
3. Participation in an online conference without a presentation or a poster
